All references provided must be for work performed within the last three (3) calendar years.

11. **BRAND NAMES**

Manufacturer's names, trade names, brand names, or catalog numbers used in the specifications are for the purpose of describing and establishing the general quality level, design and/or performance desired. Such references are not intended to limit or restrict bidding by other vendors but are intended to establish the quality, design or performance characteristics desired. Any bid including like quality, quantity, design or performance characteristics will be considered.

12. **SUBSTITUTIONS**

Questions related to the specifications and/or drawings must be directed to the Procurement Officer Representative (POR) in writing. **Do not place the solicitation number on the outside of the envelope containing questions sent to the POR as the envelope may be identified as a sealed bid and not opened until after the official due date/time.** Negligence in preparing a bid confers no right of withdrawal after the due date/time.

Prior to the bid due date/time, requested substitutions of materials, products, or equipment specified (including manufacturer changes, trade name, mode, catalogue number, patented article, etc.) will be considered when a written request is submitted on a Prior Approval Request Form, ATTACHMENT I, (complete one (1) form per substitution). The form must be submitted to the POR in accordance with the following procedures contained in the next sections of this document (PRIOR APPROVAL, TIME OF SUBMISSION, FORM OF SUBMISSION, FORM OF APPROVAL).

13. **PRIOR APPROVAL**

Substitutions may be requested by Bidder, Subcontractor, Manufacturer, or any other qualified party who proposes to use of a particular material, product, or equipment in lieu of those specified. Written submissions must clearly state the project/bid number and be directed to the POR.

14. **TIME OF SUBMISSION**

Requests for prior approval must be received by 3:00 PM, (AZ Time) eight (8) calendar days prior to the Bid Opening date in order to be considered.

15. **FORM OF SUBMISSION**

Requests for substitution approvals shall be submitted on a "Prior Approval Request Form", (ATTACHMENT I) included in this Solicitation.

- NOTE: The burden of proof and/or demonstration of merit for a particular substitution request is up to the bidder. It is the bidders responsibility to develop and establish the content of the submittal data, samples, and any other item necessary to corroborate its claim.
- Request must include sufficient basic data and the characteristics the proposed item to allow a direct comparison to be made. Knowledge and experience of the applicator may be an integral part of specification, therefore descriptive data concerning the applicator (i.e. experience, organization, references, projects, dates, etc.) may be of substance.
- Inadequate information, data, characteristics, etc. provided to the POR by the bidding vendor may be cause for rejection of the request. The POR's approval or rejection of the requested substitution is final.

16. **FORM OF APPROVAL**

Approved requests will be set forth in an addendum to be issued no later than 3:00 PM, five (5) calendar days prior to the Bid Opening Date.

17. **AFTER AWARD OF CONTRACT**

Substitutions will not be considered except when the originally approved materials or equipment is no longer available. The POR may consider a formal request for substitution under the following conditions:

- A. The request is accompanied by complete data on the proposed substitution which confirms compliance with the Contractual documents to include: Product Identification and Description, Performance/Test Data, References and Samples (when applicable). An itemized comparison of the proposed substitution must be submitted and include the products specified or named by Addenda with all data relating to Contract time schedule, design and artistic effect.
- B. The request is accompanied by accurate and complete cost data of the proposed substitution compared with the original product specified -- whether or not modification of the Contract sum is to be a consideration.
- C. When forwarded by the Contractor to the POR, requests for substitution are understood to mean that the Contractor:
 - Represents that he has thoroughly and personally investigated the proposed substitute product and then determined that the proposed substitution is equal to or better than the items originally specified;
 - Will provide the same guarantee for the substituted item that he would for that specified;
 - Certifies that the cost data presented is complete, accurate and includes all related costs under this Contract, but excludes costs under separate contracts, and that he waives all claims for additional costs relate to the substitution which subsequently becomes apparent; and
 - Will coordinate the installation of the accepted substitute and make changes as required for the work to be completed in all respects.

Substitutions will not be considered if:

- Implementation requires a substantial revision of the Contract Documents in order to accommodate usage.
- They are indicated or implied on shop drawing submissions without a prior approved formal request.
- D. Specified equipment has been clearly reviewed and approved for size/weight requirements and that space allocations have been made accordingly. Where other acceptable manufacturers are approved, their equipment is acceptable as to quality of manufacture. It is the responsibility of the Contractor to ensure that the equipment fits into the space allocated, make approved modifications to accommodate equipment other than that detailed, and ensure weights are not excessive. Contractor shall guarantee that the equipment meets all requirements of the Specifications and Drawings.
- E. The POR may require the Contractor remove from the site, material or equipment not specified. The POR may also require the Contractor to substitute satisfactory materials or equipment without delay at no added cost to the Owner. Work damaged or distributed by the change shall be the responsibility of the Contractor."
